

HEATIZON

SYSTEMS

M326A

Aerial Snow Switch

Line or Low Voltage Control

Features:

- Activates System when moisture is detected and temperature is below 34° - 44° F : Field Selectable
- Automatic Activation means Lower Deicing Costs
- Reliable Rain and Snow Detection
- Replaceable Precipitation Sensor
- Easy Installation, Full Access to Electronics
- 8 Different Functions, 1 Part Number
- Adjustable Temperature Trigger Point
- Adjustable Delay Off Cycle, Selectable 30-90 Mins
- Exclusive Adjustable Sensitivity Control
- Selectable Low Temperature Cutoff
- Smart "Manual On" Operates for One Delay Off Cycle

Specifications:

- Requires 120 VAC / 240VAC
- Full 30A @ 120/240VAC Control
- Dimensions: 4³/₄"(120) x 7"(178) x 2³/₄"(70)
- Weight: 2 pounds

Applications:

- For Use with M330G Series Control Units
- Snow Melting
- Roof Deicing
- Gutter Deicing/Melting
